

MER - Modelo Entidade-Relacionamento | Greenerry

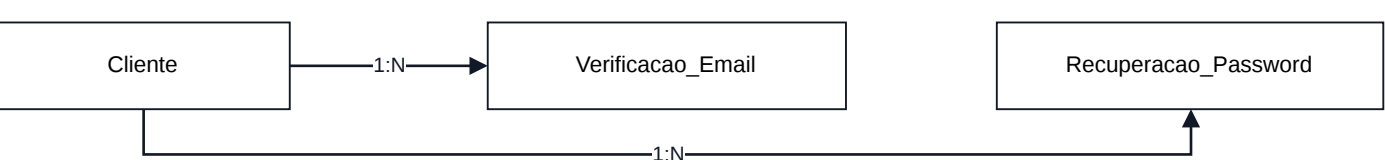

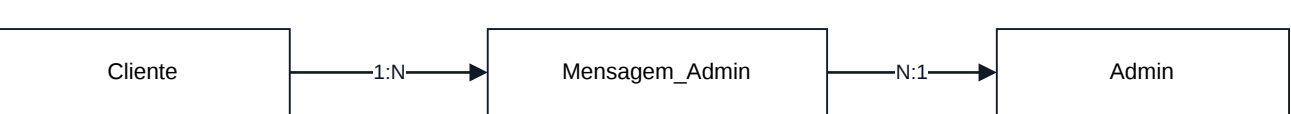

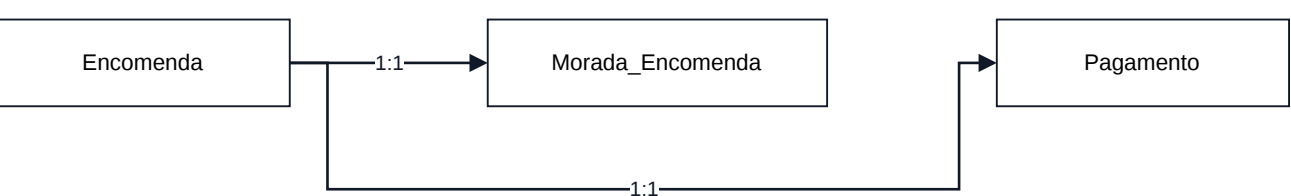

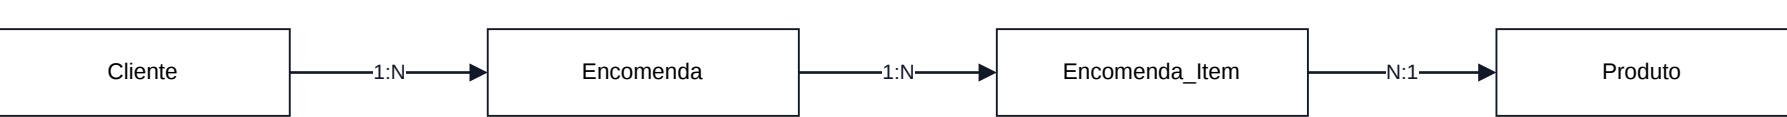

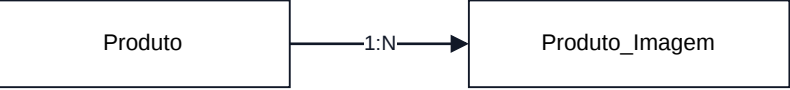

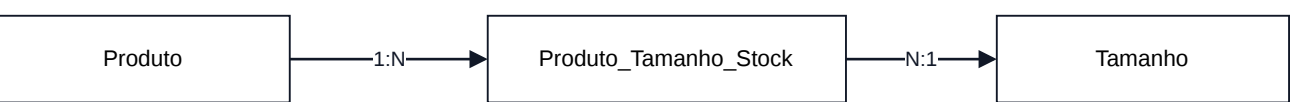

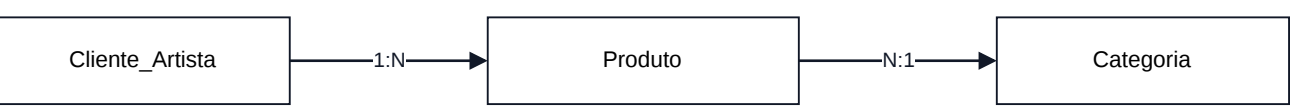

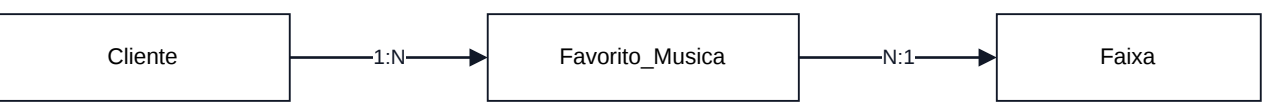

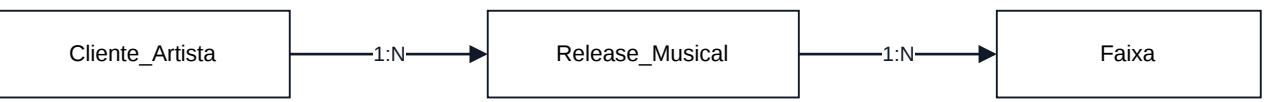

Modelo conceptual organizado por relação. Cada linha representa uma relação independente para evitar cruzamento de ligações.

Legenda: 1:N = um para muitos | N:M = muitos para muitos | 1:1 = um para um

MER

Diagrama geral compacto. As entidades são repetidas por bloco para manter todas as relações limpas e sem interseções.

FNN

Formas Normais aplicadas ao modelo da base de dados Greenerry.
